Allowable Subject Matter

1. Claims 11-29 are allowed.

Independent claim 11 is directed towards a method for audio/visual communication for the hearing impaired including "... providing said at least one hearing impaired person with at least one display, wherein sound emitted by said speaker and received by said hearing impaired person essentially does not allow said hearing impaired person to understand said speaker; capturing continuous video images of said mouth of said speaker using said camera; and transmitting said images in real-time in an uncompressed manner to said at least one display for said at least one hearing impaired person to view such that movement of said mouth of said speaker coincides with sound emitted by said speaker and enables said hearing impaired person to understand said speaker..." which is a feature that is not anticipated nor obvious over the art of record. Dependent claims 12-29 are allowed for the reasons concerning the independent claim.
